LeTriple[®] Basic

LeTriple Basic is a comfortable and functional special work chair. The frame offers good movement options. What can be noticed within this context is the compact frame, which means that you will have much room left to, for example, get near to the kitchen worktops. This will ensure that you can work appropriately.

SITTING HEALTHILY

The chair is user-friendly and has different adjustments. The seat, backrest and armrests can, for example, be adjusted based on your preferences. Because the chair can be adjusted to suit the dimensions of the user, the correct working posture can be created. This will offer good support for your body and is important for a good distribution of pressure and sitting in a healthy manner.

FUNCTIONALITY

The electrical sitting height adjustment of 30 cm ensures that you can continue to sit correctly even in situations when your working height is different. In addition, the sitting height adjustment may help when getting out of your chair.

COMFORT

Because the chair has different options and possibilities, an adjusted comfortable chair is created for the user. In short, this comfortable chair ensures that you can again work comfortably independently.

electric adjustment
high/low
from 43 to 73 cm

sitting adjustment
tilting
angle 3° forwards / 5° backwards
